BACE Box

Logistics hub & parcel station

The BACE Box creates real added value for customers and providers by additional service offerings. It offers a novel, innovative last-mile solution for retailers, companies, administrations, municipalities, real estate providers or private individuals. This parcel service station optimizes the interaction between customers, employees and the private sector.

More revenue and higher value added

- Improvement of the current situation around parcel stations on the market, which are limited in terms of deliverer independence and the possibilities for integration and development of further services and logistics offers
- Integration of existing services from operators such as retailers, companies, administrations, municipalities, real estate providers or private individuals possible
- Improved access management (collection & access can be shared)
- Non-discriminatory access (delivery agent independence)
- Creation of real added value for customers and providers by expanding service offerings
- Increasing local consumption through cross-selling and upselling at the box (improved offerings)
- Serving megatrends such as sharing economy (making services & offers shareable) or sustainability (reducing distances, time & emissions)

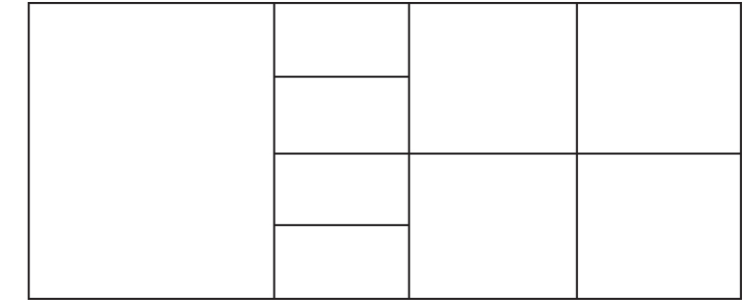

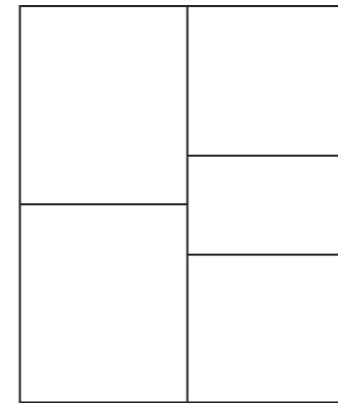

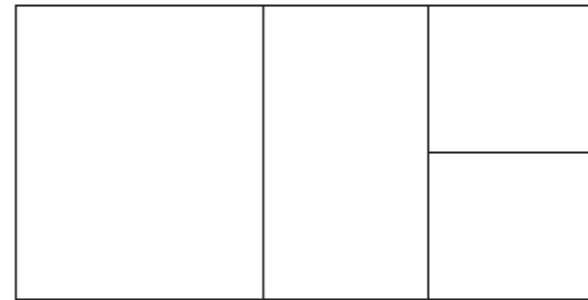

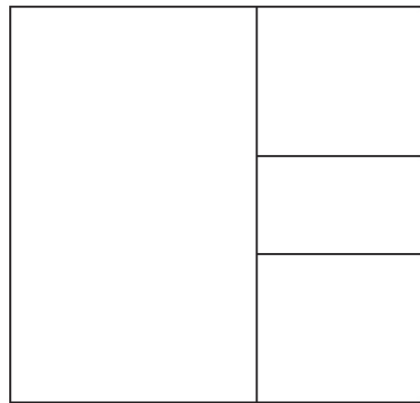

Added value for your customers

- Carrier-independent access without registration
- 24/7 service for customers: Pick-up, returns, multiple deliveries
- Availability of goods for the customer the same day possible
- Shipping costs savings
- Secure and discreet storage
- Increased customer satisfaction
- Services such as rental models for equipment storage, food delivery services or personel sharing possible
- Possibility to expand to an e-mobility station for e-scooters, e-bikes, etc.

BACE is a product of the venture builder BEHIND.

Added values for you

- Service extension
- Utilization maximization
- Up-/Cross-Selling
- High quality product design & material (shelves made of galvanized sheet metal)
- Customizable in all RAL colors and with logo
