Geck®
SensorTouch

Smart hygiene systems for touch-free
disinfection.

Extra class
hand hygiene

The hygenic allrounder

The Geck® SensorTouch- dispenser offers maximum convenience and scores with a touch-free operating concept. Not only do you reduce the risk of infection, but you can also save costs through individual configurations - especially with high visitor frequencies. The modern design speaks for itself and fits perfectly into any ambience. Whether in entrance and exit areas, in walkways, at counters, cash registers or reception areas - our SensorTouch systems are an ideal and aesthetic solution for all public spaces.

A safe thing - even after the pandemic

With the Geck® SensorTouch-dispenser, you can protect your team and your visitors from contact infections, especially now during the pandemic. But even beyond the crisis, the hygiene system scores points all along the line. Whether in a café, supermarket or fitness center: Where there are many visitors, there are also many germs. Different pathogens make their way. With our SensorTouch dispensers, you prevent this even after the crisis and prevent disease transmission.

Individual Freedom of choice

You know what you want - we make it happen. The Geck SensorTouch dispenser is not only versatile, but can also be combined in a variety of ways. For example, combine the dispenser stylishly with the Aramia or Aguada disinfection column or simply with the Aroa column. Here, in addition to the choice between different styles, you also have the option of different materials such as wood, plastic or stainless steel. Depending on your wishes and needs, you can put together your own personal disinfection column.

Focus on your needs

The smart system also offers many different setting options. Adjust the Geck® SensorTouch to suit your needs.

Do you want to prevent double spraying? Then configure the time between the sprays. You can also easily adjust the metering quantity and the sensor sensitivity. These and many other configurations are always at your fingertips.

Powers elegant

A clean affair through and through: Our SensorTouch dispenser relies on a powerful, environmentally friendly rechargeable battery, but offers the possibility of using commercially available energy sources in AA format or 9 V rechargeable batteries as an optional back-up function. In addition, the long runtime saves you having to change batteries frequently. A 3-stage LED display shows you the charging status.

Saubere Sache

Hygienic and convenient emptying and cleaning of the optional drip tray through removable stainless steel inlay.

Material & Dimensions:

- Housing made of stainless steel 1.4301 ground
- 250mm x 250mm x 110 mm

Exploded view

Smart on site

Our efficient dispenser always makes the right first impression when it comes to design, professionalism and hygiene. Slim, it blends it blends into any room design.

Easy transport

Optionally, the disinfection columns can be equipped with integrated rollers for changing positions

Independent and flexible

No matter which disinfection liquid you want to use, any approved liquid agent (no foam or gel) can be refilled. With 1000 ml capacity, our SensorTouch dispenser offers plenty of space and saves you valuable time.

Focused on the essentials

The smart sensor detects interfering objects in the sensor field and automatically fades them out after just 15 seconds. If interfering objects disappear, it adjusts itself to the regular distance again within 5 seconds.

Increased cost efficiency

The various parameterization options of our control system allow considerable savings in the consumption of disinfectants.
