Geck® Indoor Tracking LO Asset-Tracking with Localino

In cooperation with Localino, our indoor tracking system solves a central problem of tracking within your closed rooms or halls. Especially in small store areas, shopping baskets can be tracked and thus walking routes of customers can be evaluated and analyzed.

Your benefits

- Especially applicable in small stores with shopping basket without shopping cart
- Individual, customized solutions can be implemented more easily
- Optionally also outdoor localization of Localino can be combined
- Simple installation
- Subsequent installation of technology possible

Technical information

- Technologies: Ultra Wide Band (UWB) and Bluetooth
- Number of anchors depends on sales area, environment and installation height
- With their small design, the tags offer flexible possibilities for integration into processes
- Power supply of the tags is possible via rechargeable battery or battery
- Battery life approx. 3 years
- Accuracy of tracking approx. 50-60cm
- Easy installation of the anchor on the ceiling and the tags on the asset
